Ameritech data solutions

TABopts

Reporting 2020

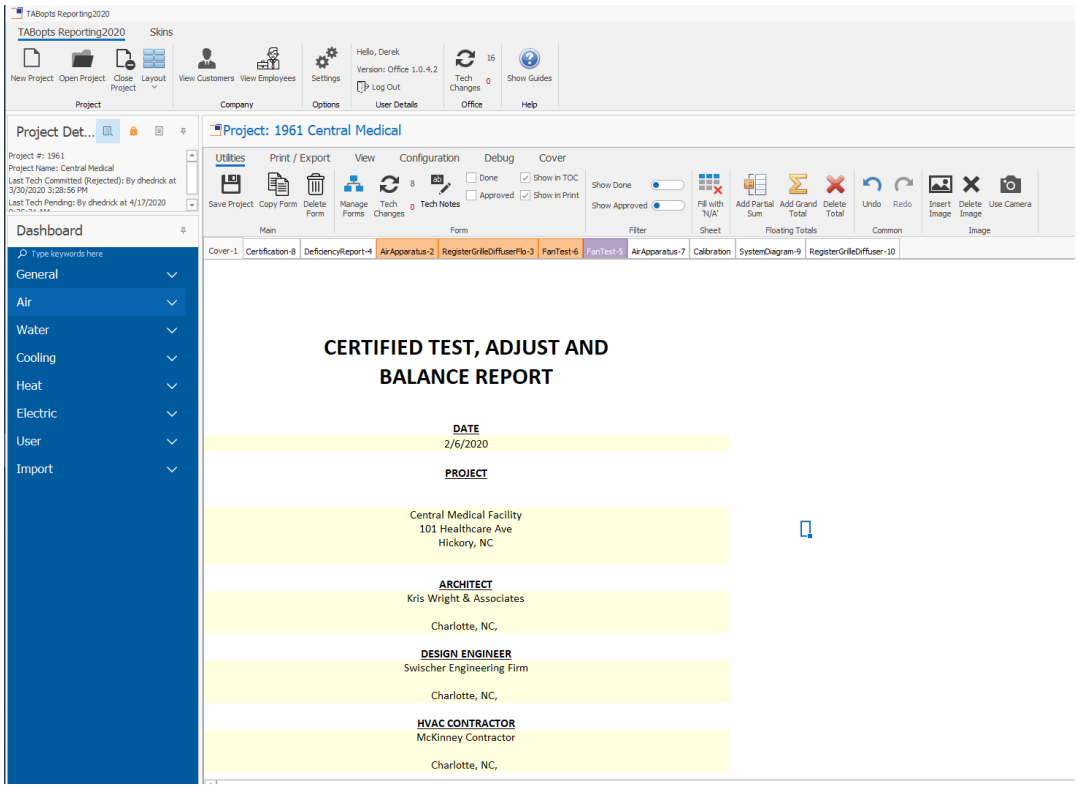
The Tab Industry's Only Customizable Reporting Solution.

PRE ENGINEER SHEETS
Reporting allows your to pre-engineer your sheets prior to send field techs in the field. This way you know you are collecting the data you need for your project.

INTEGRATION
Utilize our Dwyer Integration module to collect data right from Dwyer Hoods and instruments.

DEDUPLICATION
Use TABopts reporting to recognize duplicate data and resolve the issue prior to the report being sent for internal review which saves time.

CLOUD BASED
Data is synchronized to your own cloud hosted data base. No Internet at the job site—no problem. Store locally and synchronize when back in the office.



- Specifically designed for the TAB firms based on over 20 years of customer input.
- Use your forms or start out with our default NEBB forms.
- Cloud storage for all your critical reporting data.

Features and Benefits

TABopts Reporting 2020 is the industry's only purpose built TAB firm reporting solution. Reporting can be used by both field techs as well as project coordinators and managers in the back office to effectively pre-engineer sheets prior to the field techs leaving to complete a job. Once the techs are on site, they utilize reporting to capture their readings directly in to the software where the results are synchronized back to the main office for report validation and completion.

TABopts Reporting utilizes both a self contained data store as well as the cloud to enable to the capture of data real-time in the filed and then synchronizing the data to the main database in the cloud. This allows your firm to review reports quicker and prepare them for delivery to your clients faster. This increase in efficiency has shown that customers who use our reporting software see an increase in the number of projects they are able to complete in a single year.

If you have spent years developing your own sheets, you don't need to throw those away and use ours. TABopts Reporting is customizable in that we can import your sheets in to TABopts reporting so that you and your field techs are using sheets that you a re familiar with. Don't have your own sheets, then we provide our standard NEBB compliant sheets in our standard version of TABopts Reporting 2020.

See for yourself by scheduling a demo today.

EASY TO USE
TABopts Reporting leverages many of the same commands and functions you are already used to so no steep learning curve to use our software.

SUPPORT
Our Software Assurance program ensures your TABopts Reporting always has the latest updates and enhancements as we release them. Phone support is also included.

CUSTOMIZABLE
We can use your sheets in our software—no having to learn new sheets or generate reports that don't have the data you need.

INTERFACE WITH TABOPTS PM
Easily share customer information between TABopts PM and TABopts reporting, Ameritech's TAB Project Management solution.
